

SOOMIN PARK

Web Designer & Front-End Developer

Burnaby, BC · Permanent Resident · ssaksoo984@gmail.com

codedesk-studio.online · linkedin.com/in/soomin-park-codedesk · Korean (native) / English (professional working)

Web designer and front-end developer with 7 years of experience across public-sector, commerce, and small-business projects in Korea and Canada. Every design decision needs a reason: usability before decoration — clarifying what a client actually needs, structuring the site so they can maintain it themselves, and giving visitors a reason to stay. Led a four-person design team in Seoul; now designs and ships client sites in Vancouver. Available immediately for full-time roles.

EXPERIENCE

Freelance Web Designer & Developer | Jan 2023 – Mar 2026

Independent Contractor, Vancouver, BC — assignments via Comma Marketing Agency (Vancouver) and Landsoft (Seoul)

- Worked as a freelance contractor for two agencies over three years, shipping **20+ sites** across wellness, hospitality, retail, and public-sector clients. Owned UI, content architecture, and deployment on each build.
- **Via Comma Marketing Agency** — Regen Pilates & Sleek Silhouettes: condensed sprawling program lists into needs-based categories and structured the sites so owners could update programs themselves. Jeon Restaurant: defined a colour and type direction for traditional Korean fine dining and rebuilt the menu as live text for SEO.
- **Via Landsoft** — Designed how to present a large emerging- and mid-career artist archive (K-Art Market) at a glance, and built the admin console for it and for Kangwon Land's operator-facing pages.
- Built with Next.js, TypeScript, GSAP, Shopify, and WordPress, deployed on Vercel. Case studies at codedesk-studio.online.

Web Designer & Design Team Lead | Oct 2020 – Dec 2022

Landsoft — Seoul, Korea

- Led a team of four designers and publishers delivering 4–5 public-sector web projects per year, from proposal stage through launch, and contributed visual strategy to competitive bids.
- **National Folk Museum of Korea — site renewal:** set the design concept for the institution's new brand identity, restructured a fragmented menu system, and delivered responsive desktop and mobile UI.
- **MU:DS online goods shop (National Museum Foundation):** owned design planning and UI for the commerce renewal, reworking main and product-detail pages to improve discoverability during a period of sharply increased order volume.

Designer | May 2019 – Feb 2020

Red Rocket (Campus Fund) — Seoul, Korea

- Designed and wrote campaign pages for a P2P investment startup (1% cashback, referral program), translating unfamiliar financial mechanics into language first-time investors could follow. Reviewed customer-service tickets and fed recurring points of confusion back into the interface.
- **Scooter Holic:** planned and designed an installment-based scooter rental commerce site end to end — vendor category system, product detail pages, and campaign pages.

Designer & Marketer | May 2018 – Dec 2018

KstarAD — Seoul, Korea

- Produced promotional and event design across in-house and client campaigns — a cryptocurrency launch, K-pop event promotions, and on-site exhibition booth signage and wayfinding — alongside social content for Food & Company (Instagram, Facebook): topic selection, headline and subhead copy, image editing. Designed and maintained the company blog.

Freelance Designer | Mar 2017 – Sep 2017

World Luxury Store — Seoul, Korea & Chengdu, China

- Designed and maintained pages for a Korea–China luxury e-commerce storefront.
